Training & Learning Management

Your learners don't have to feel like you're wasting their time. Give your people a fresh approach when it comes to compliance training.

Countless scientific studies show the comparative effectiveness of interactive, engaging, relevant, and updated e-learning courses versus old-school text-heavy slides with a voice-over.

CLARITY

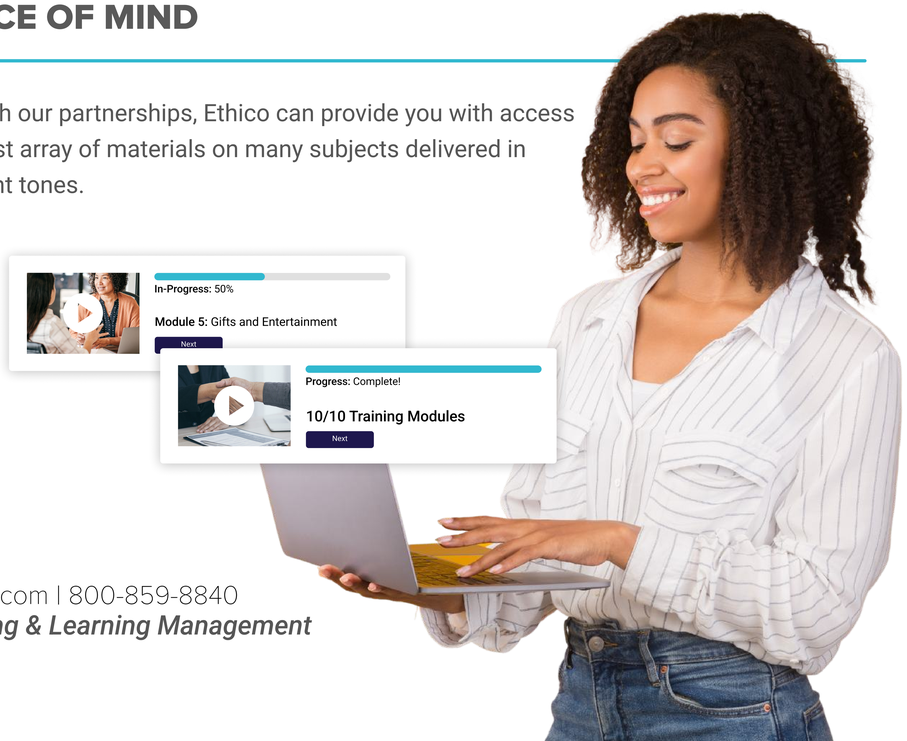
Easily launch, customize, monitor, and reinforce key lessons with memorable courses across any LMS.

SERVICE EXCELLENCE

Our engaging content utilizes modern features such as gamification, micro-learning and experiential video learning.

PEACE OF MIND

Through our partnerships, Ethico can provide you with access to a vast array of materials on many subjects delivered in different tones.



THE CHALLENGE

Regulations require training on compliance and ethics for your workforce. You can choose this opportunity to simply check the box or you can choose to use training as a way to supercharge your organization's culture. Sometimes a little education is all someone needs to recognize right from wrong, but this instruction can fall on deaf ears if it is not delivered in a way which your workforce retains.

THE SOLUTION

Ethico's LMS solutions are your answer for interactive training that you don't just watch, you experience. Leverage our robust library of world class content. Or increase relevancy when you overlay your own policies, local culture, and stories for a custom learning experience.

WHAT YOU GET

Access to a library of continuously updated award winning training modules. All generations will enjoy the familiar TV-series format that uses five to eight-minute broadcast-quality episodes or try quick vlog-style micro-learnings to strengthen your culture throughout the year. Training courses can integrate with any LMS; however, the Ethico LMS can support your needs just as well with easy to send invitations and reminders. Dashboards allow administrators to monitor completion rates, customize training, and send out micro-learning refreshers. You can even compound your effectiveness by integrating policy and incident examples directly into lessons.
